

DOI Work Activity 06: Recover Threatened and Endangered Species

Program Area:	Biological Communities
End Outcome Goal:	PEO 2 – Sustain Biological Communities on DOI Managed and Influenced Lands and Waters in a Manner Consistent with Obligations Regarding the Allocation and Use of Water
Intermediate Outcome:	This activity does not align to an intermediate outcome
DOI Sub process:	4d – Conserve resources

Examples/Notes:

Work Activity Description: All labor and operating costs associated with support and participation in the development of recovery plans and/or conservation strategies, all actions necessary to actually implement or facilitate implementation of recovery activities for species listed under the Endangered Species Act.

Recovery Plan Activities include: development of draft recovery plans, revision of existing recovery plans, peer review, publication in Federal Register Notice of Availability, public information meetings, responses to public comment, stakeholder involvement, and development of final recovery plans. Listed species recovery plans, including species conservation strategies, are requirements of the Endangered Species Act.

Recovery Implementation Activities include a wide-range of management actions, such as controlled propagation and habitat protection and restoration that reduce threats or otherwise benefit listed threatened or endangered species populations so that they will stabilize and ultimately increase.

This work activity does not include the development of plans or recovery actions that are led by the National Marine Fisheries Service.

Output: Completed recovery actions performed	Unit of Measure: The number of recovery plans or species conservation actions performed for listed or proposed/candidate species.
